LÄDERACH

SWITZERLAND

# Dear Chocolate Lovers,

Every occasion is an opportunity to celebrate the people who make a difference in our lives. Our colleagues, clients, business partners, friends and families deserve a gift that feels thoughtful, personal and memorable.

At Läderach, we believe fresh chocolate makes those moments even more special.

For our corporate partners, our team is here to make gifting simple. We can help you select the right assortment, personalize your gifts and coordinate delivery to recipients across your list, allowing you to focus on what matters most: the relationships behind each gift.

What makes a Läderach gift truly special is more than what is inside the box. It is the experience of sharing something fresh, beautifully crafted and made to be enjoyed together.

From our Läderach family to yours, I invite you to share the joy of fresh chocolate with the people who matter most to you.

Warm regards,

**Warren Dunkelberger**

Our chocolate is made exclusively in Switzerland—in the beautiful Glarus region. This is where we produce our fresh couvertures every day and refine them into FrischSchoggi and pralines—in many cases still by hand using traditional methods.

Elias Läderach is one of the best chocolatiers in the world. He is the first Swiss chocolatier to win the World Chocolate Master title. His innovative spirit inspires our chocolatiers to come up with new creations day after day.

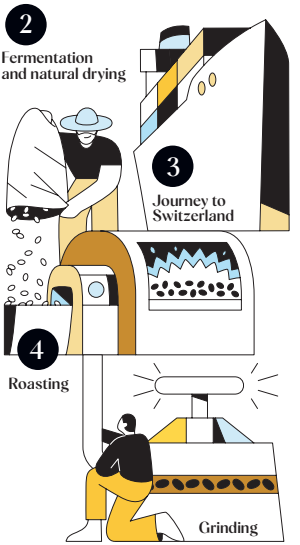

# From bean to bar to you

1. When the pods are ripe, they are cut from the tree. Each pod contains about 40 cocoa seeds.

2. Fermentation is crucial for flavor development. Subsequently the beans are slowly dried for optimal quality and flavor.

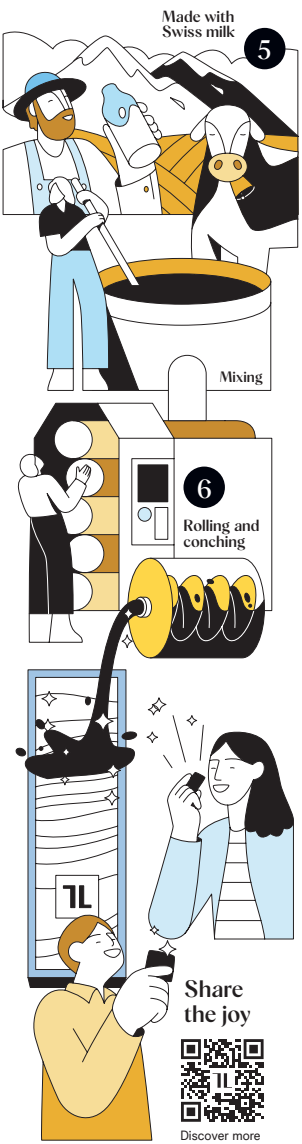

3. After arrival in our Swiss warehouse, we recheck all key quality parameters. The cocoa beans are then cleaned, and their shells gently removed.

4. What remains are the cocoa nibs, which are then roasted at different temperatures, depending on their variety and origin. The nibs are then finely ground producing pure cocoa mass.

5. At the mixing stage, liquid cocoa mass is blended with carefully selected ingredients.

6. During conching, the mixture is heated to around 40–50 °C (104–122 °F), allowing the ingredients to blend into a smooth, liquid couverture.

To preserve the irresistible aroma, our fresh couvertures are crafted into bars, carrés and all other chocolate creations within just a few days.
